

Safety Is Our Core Value

Safety is Badger's top priority. Our safety protocols, standards and innovative technology mitigate the risk of damage to all known and unknown underground infrastructure to prevent accidents and injury to personnel.

Our health, safety and environmental program has been designed to strengthen our safety culture and meet or exceed industry standards. Our goal is zero incidents. We continually work to improve our processes, trucks and training by educating our employees and clients in order to keep all personnel safe.

About Badger

Badger Daylighting™ is the industry leader in non-destructive hydro excavation services. Since 1992, Badger has been innovating cutting-edge technology providing services to a diverse customer base including oil and gas, energy, industrial, construction, transportation and other markets, as well as numerous government agencies within Canada and the United States.

For the past 25 years, Badger has been committed to creatively solving our clients' infrastructure needs and challenges by delivering a safe and reliable service. Badger delivers a broad range of services and applications including:

- Daylighting
- Potholing
- Utility pole holes
- Slot trenching
- Service pits
- Trenching
- Debris removal
- Anode installations
- Shoring installations
- Pipeline crossing
- Pipeline tie-ins
- Tank cleanouts
- Emergency response

Convenient, Safe and Reliable For 25 Years

Badger has been a trusted partner in providing quality and comprehensive solutions to a full spectrum of industries. We deliver alternative, competitive, transparent and viable solutions that provide a safe and reliable outcome.

- Improve production with fewer project delays, which reduces expenses.
- A team of professionally qualified and trained operators.
- Innovate change to deliver top performance with high efficiency.
- Industry know-how, dedication and passion.
- Safe, reliable and efficient means of excavation minimizing impact to the environment.
- Network of over 100 locations within North America.
- Over 1,000 hydrovac.

Productivity and Innovation

Badger's in-house team of engineers devote themselves to creating innovations, building more than just The Badger Hydrovac System™. The Badger Fleet offers a diverse range of features and service capabilities to new and existing markets. Our advancing technology is developed in response to the environmental stewardship and market demands.

Whether it's the hand-built craftsmanship of the Badger Hydrovac or our other support units, we apply our industry know-how and experience to consistently provide state-of-the-art technology for emerging innovations which drive change and process improvements across the industry.

As a result all Badger Units are built in accordance with the strictest quality standards to provide the most efficient, non-destructive, agile and cost-effective solutions available. Delivering on our motto of Best Truck and Best Operator, Badger Units are developed not just to perform, but to safely outperform.

Badger's continual advancement reflects our ongoing commitment to delivering innovative, safe and robust solutions to efficiently solve the challenges of today's businesses.

Efficiently solving the challenges of today's businesses.

Badger Units have the capability to excavate at a distance of over 300 feet from the truck, enabling crews to work in remote areas with limited access.

Another significant benefit of The Badger Unit™ is its versatility to excavate in extreme winter conditions. Badger Units were designed to excavate through frozen ground, enabling year-round production.

The Badger Unit™ is a product of skilled craftsmanship, delivering a reliable performance keeping your projects on-line, helping operations decrease costs and improve productivity to meet tighter deadlines.

Qualified Operators

Our industry trained and experienced operators deliver safe, professional and efficient service. Badger's Operators provide solutions to the most complex situations, adding value to your infrastructure, construction repairs and maintenance projects.

Committed to the highest of standards for our employees and customers, Badger Operators are trained through our Mentor Training Program. Our carefully selected Mentors train and mentor new Operators on The Badger Unit™, safe work practices, specific job procedures, safety hazards and recognition, professionalism, customer service and defensive driving.

Safety is what we do.
Safety is what we deliver.

Best Operator and Best Truck
